User Stories

By the LCJJ SE:PT Development Team

As a business owner, I would like to make a booking on behalf of a customer so that customer does not have to make it themselves.

Criterion 1

Given the business owner has successfully logged in to their management account and the business owner has navigated to the 'bookings' page

When the business owner clicks 'add new booking' and the business owner fills in the correct and valid details

Then the booking will be added to the system and be viewable on the bookings page

Criterion 2

Given the business owner has successfully logged into their management account and the business owner has navigated to the 'bookings' page

When the business owner clicks 'add new booking' and the business owner fills in the form with invalid details (eg. Booking outside of business hours)

Then the system will display an error message and prompt the user to review their booking

As a business owner, I want to define an activity for a booking so that customers can select activities to book instead of start and end times

Criterion 1

Given the business owner is logged in successfully

When the business owner visits the admin activities page and makes an activity

Then the activity is made and the activity can be used to create bookings from the customer or the business owners booking page

As a business owner, I want to edit employee working times so that I can keep employee working times up to date

Criterion 1

Given the business owner has successfully logged in to their management account

When the business owner visits the admin roster page and clicks edit on an existing working time. And edits working time and validates accordingly

Then the working time is updated.

Criterion 2

Given the business owner has successfully logged in to their management account

When the business owner visits the admin roster page and clicks edit on an existing working time. And inputs an invalid working time, where an employee is not available

Then show an error on the same page

As a customer, I would like to make a booking so that I don't have to make one in person

Criterion 1

Given the customer has successfully logged in to the system, the customer has selected a booking from the list of available bookings they would like to book and an employee is available at the selected booking time

When the customer selects an activity (defined from the business owner)

Then the appointment will be added to the customer's existing appoints, the appoint will also be recorded in the database and made unavailable in the system

As a business owner, I want to assign an employee to an appointment so that they can assist the customers in their appointments

Criterion 1

Given the business owner has successfully logged in to their management account and the selected employee is working at the time of the appointment

When the business owner attempts to assign the employee to the appointment

Then the employee will be assigned to the appointment in the database and the appointment will be marked as staffed in the database

Criterion 2

Given the business owner has successfully logged in to their management account and the selected employee is not working at the time of the appointment

When the business owner attempts to assign the employee to the appointment

Then an indicator that the employee is not available during this time will appear, prompting the business owner to instead choose another employee who is available
